

# Visualizing Information Panel for Virtual Environment

Wei Huang, Yao Zhang

# Introduction

## Motivation

- The rise of VR
- Information everywhere

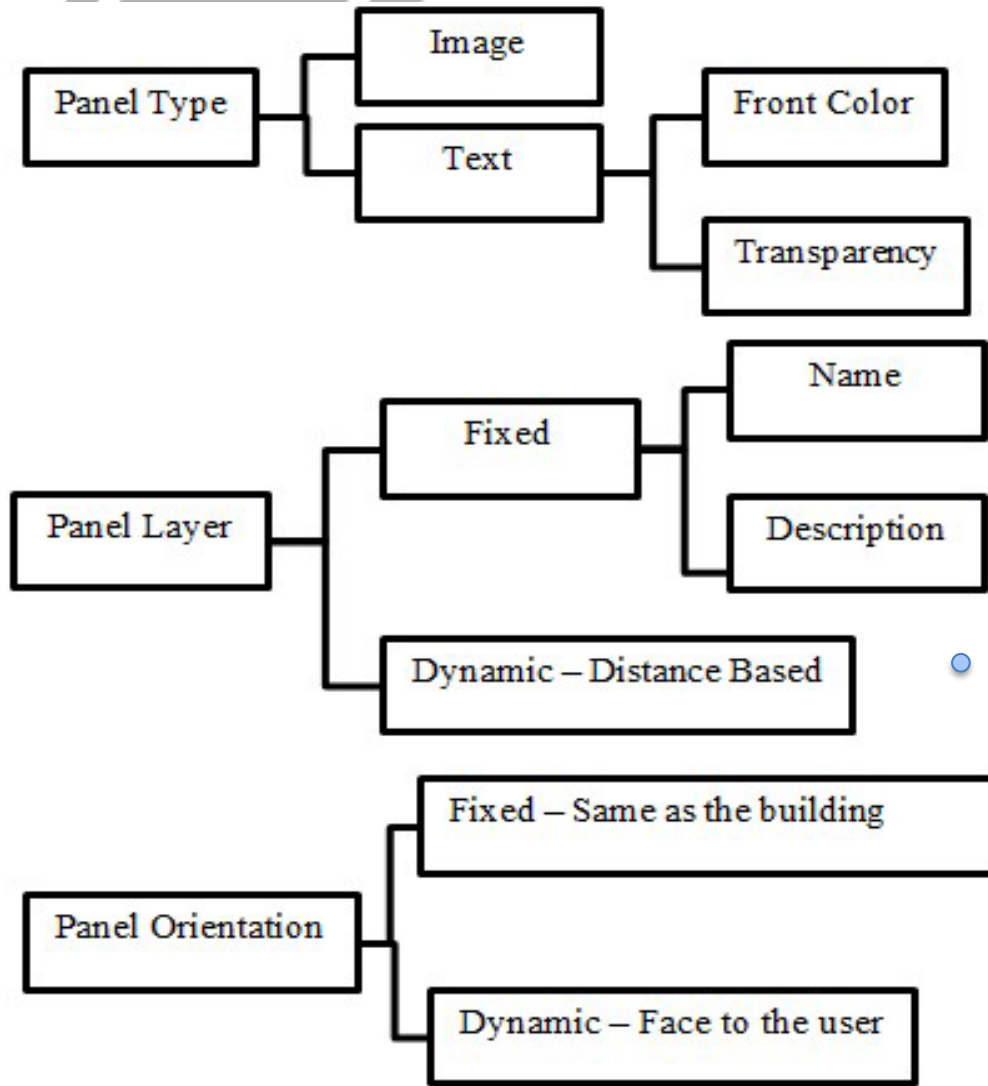

## Design

- Two panels: *Hierarchical* vs. *All-In-One*
- Two tasks: Name -> Info, Info -> Name

## Hypotheses

- *Hierarchical* panel better than *All-In-One* panel
- Demographic factors affect user's experience

# Panel

Text  
Wins

Which is better ?

Always Facing  
to User !

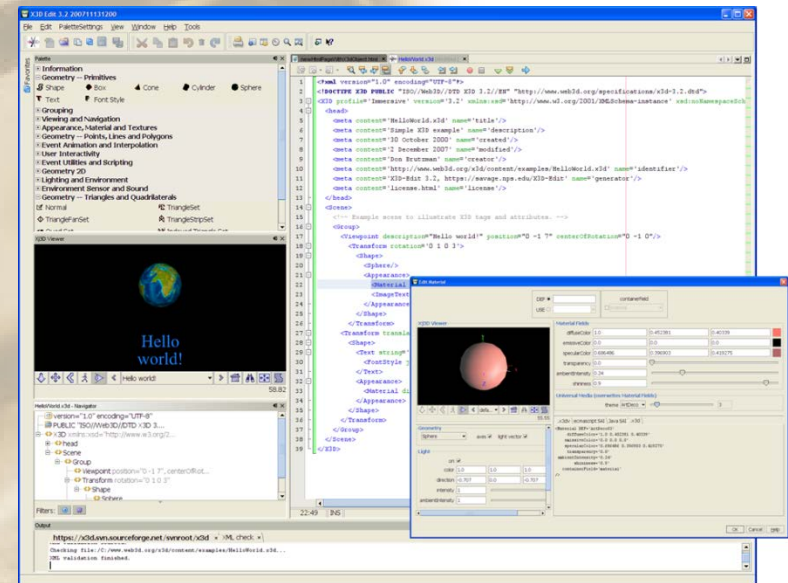

- *All-in-One* Panel  
only one panel contains both name and description
- *Hierarchical* Panel  
far - name panel; near – information panel

# Implementation

Hardware: VisCube (including hand controller)

Software: X3D-Edit, Vivaty Studio

X3D: <Text>, <LOD>, <Billboard>

# User Study - Procedure

## Pre-study Questionnaire

- Demographic
- Background

## Training Task

- Preview Interface
- Learn to use hand controller

## Tasks (2\*2)

- Completion Time
- Accuracy

## Post Questionnaire

- Subjective Evaluation
- Preference

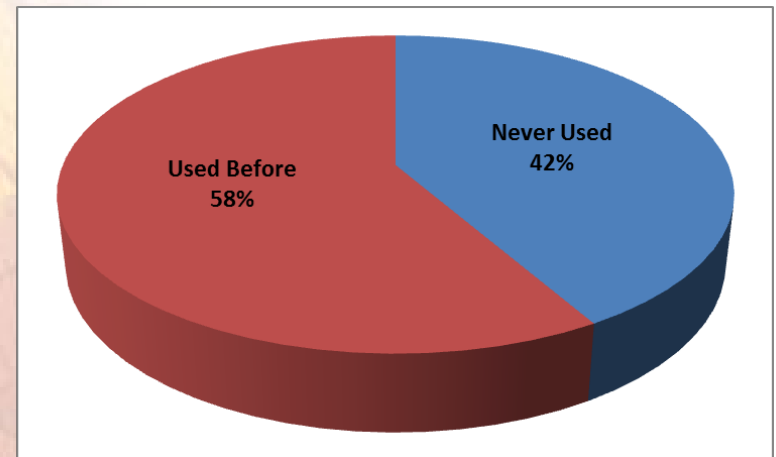

# User Study – Task Set

- Task Type 1, Hierarchical panel
- Task Type 2, Hierarchical panel
- Task Type 1, All-in-One panel
- Task Type 2, All-in-One panel

Type	Task
1	Given some information of a building name, find some specific information.
2	Given some information of a building, find such buildings.

# User Study - Participants

12 participants thanks for SONA system & mailing list & etc...

# Overall Result

ANOVA

	F	p
Task 1	61.05	$8.72e - 08$
Task 2	0.61	0.44

Completion Time

	T1-H	T1-A	T2-H	T2-A
mean	120.17	260.83	284.3	260
std	32.92	52.97	78.07	77.72
max	186	380	485	400
min	80	190	197	153

Accuracy

	T1-H	T1-A	T2-H	T2-A
mean	0.945	0.93	0.792	0.875
std	0.128	0.112	0.257	0.199
max	1	1	1	1
min	0.67	0.67	0.25	0.5

# Analysis - Boys vs. Girls

## Male

- Higher Average Accuracy
- Shorter Completion Time with Hierarchical

## Female

- Two Preferred All-in-One
- Shorter Completion Time with All-in-One

# Analysis – Played VR Before?

Novice Take More Time

- Hand controller
- 3D scene

# Analysis – Glasses Really Matter

## Myope Take More Time

- VisCube
- 3D scene

# Subjective Feedback

## User Interface

Readable and user-friendly (All)

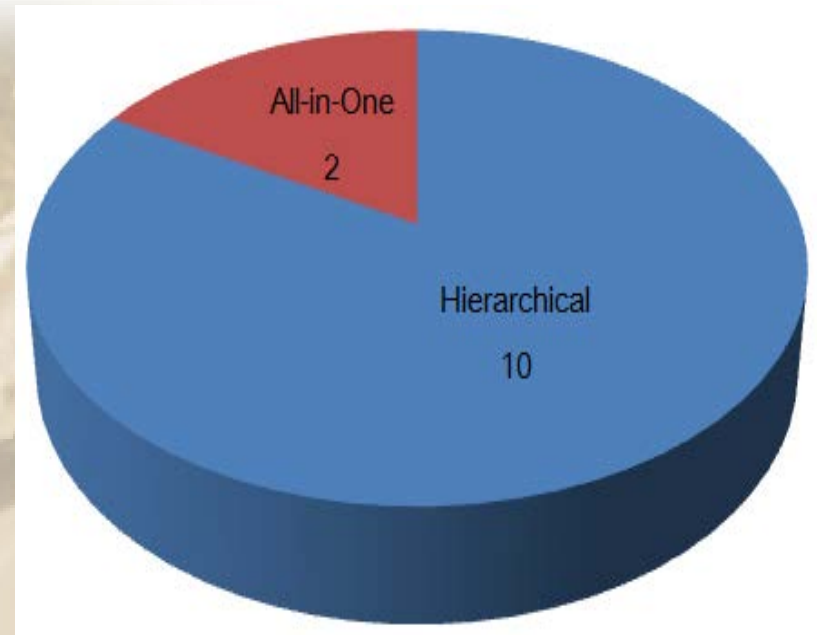

## Rendering

Smooth and neutral (Most)

## Control

Satisfied with hand controller (Most)

A little difficult to go up/down (Novice)

# Conclusion

## What We Done

- Design Hierarchical Panel
- Implement Two 3D UIs
- Perform User Experiment
- Analysis & Discussion

## What We Found

- Hierarchical is Better
- Demographic Factors' Effect

*Thank you~*

*Q & A*
